January 2012

Wayne Community Schools has been outsourcing our bus transportation needs to Mid States School Bus since 1992. In my experience, this has been a very positive relationship that provides quality transportation for the students of our school district. Not only does Mid States School Bus provide excellent service for the students of our district, outsourcing to them allows me as superintendent and our other building administrator's the ability to take care of other aspects of our jobs in a more effective manner. With the excellent service they provide, it is not necessary for us to worry about the many logistical transportation issues that come with dealing with student transportation.

When planning our school budget we are able to accurately project the cost of our transportation because there are no unexpected costs for bus repair or replacement, no unexpected issues with employment of staff, and no management issues with staff as Mid States School Bus hires and manages the bus drivers and mechanics that provide the service.

I sincerely recommend Mid States School Bus as an effective way to provide the very important aspect of student transportation for any school district. Not only do they do an excellent job transporting our students on safe buses, the staff is always friendly, accommodating, and professional when I have questions or concerns.

Sincerely,

Mark A. Lenihan

Superintendent

Wayne Community Schools
